WELDING ART

Outlines the skills needed to set up gas metal arc welding equipment and the safety involved. Also covers skills needed for set up and safety in plasma cutting operations with an emphasis toward artistic fabrications.

Robert Sanchez is the full-time welding instructor for TSJC. Prior to working at the college, Robert worked for Topar Welding as a gas field welder. He has been welding since 1998 where he started out as a structural welder working on schools and other buildings.
