Saturday, July 12th - Starting Your Own Business
(1-day, 8 hours)  Cost $60.00

**Course description --**
Students will learn the process of starting a small business. This course is designed for people that may want to start a small business and need information on “what to do”. We will use resources given by the Small Business Association and teach you the steps it takes to make your business official. This should give you a good introduction to the process of starting a business and give you resources that you can use to do it yourself.
Topics will include: Creating a Business Plan Choosing a business structure, such as sole proprietorship, partnership, corporation, etc... Registering your business with state and local governments Attaining licenses and permits Taxes and Insurance

**Brian Cumby** is the full-time CNC machining instructor for TSJC. He previously owned the Salida Sign Shop and has extensive experience with CAD/CAM design work using CadKey, BobCad, Artcam, flexisign, and Autocad. In addition to machining and design, he is experienced in general metal work and machining by hand. Brian has a B.A. degree in Engineering Management (Business Administration)

No supplies or tools needed – just bring paper and pen to take notes.
